

Pet Suites is an all suites resort for pets

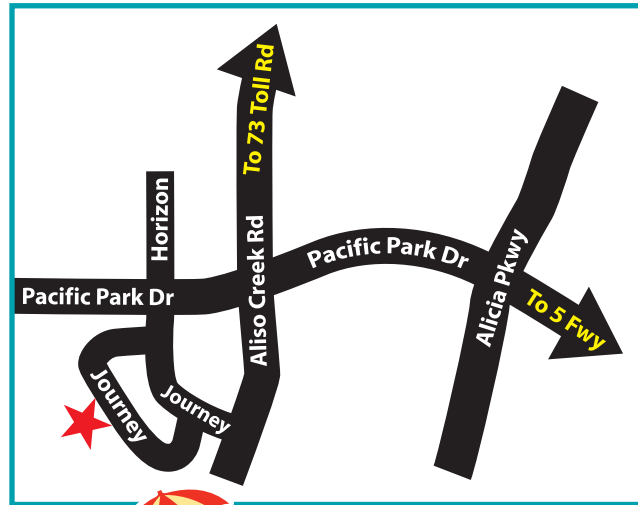

If you're going on vacation or just going to work, your pet will enjoy a wonderful stay from the moment of arrival.

Welcome— After check in, each guest is escorted to their own spacious suite, complete with a comfortable, clean bed, color television and background music. Each pet is escorted individually to our outside enclosed and very spacious courtyard.

Guest Amenities— Our guests have plenty to do during their stay at Pet Suites. For exercise, every guest is escorted to an outdoor, enclosed, courtyard several times each day. Your pet can make friends during the Play Pals Program, Camp, Tiny Tots, or can play one on one with our playtime personnel. Back in their suite, our guests can watch TV and enjoy daily matinees. We offer a variety of special treats, including frozen peanut butter Kongs, Frosty Paws, or you may select something special from our Bone and Biscuit Buffet.

Room Service— Each guest is fed with the finest, most nutritionally sound cuisine available. If your little one has a special diet, we can accommodate individual needs. We want every guest to be happy and healthy during their stay at Pet Suites. If your pet is used to special attention at bed time we also offer Tuck-in Service upon request. An attendant will go to their suite before "lights out" and spend time with your pet, serve a small biscuit treat and even tell them a story if they seem especially anxious.

Luxury is Standard

- Veterinary-owned and supervised
- Color TVs in six pavilions ensure each pet easy viewing
- Climate controlled pavilions with UV filtered air
- 5-7 "outings" a day
- **Special diets** and medication supervised by qualified personnel
- Plush, cozy and clean sleeping accommodations
- Skylights throughout welcome in the sunshine
- Soft instrumental music throughout resort
- Daily supervised playtime in large, outdoor yard
- When your pet boards 3 days or more they will receive a complimentary bath
- Now available, fun themed birthday parties
- All breed grooming for dogs and cats
- We offer Therapeutic Hydrosurge® bathing and teeth brushing
- Doggie Day Camp (*play groups or private accommodations*) while you work
- We offer a variety of packages including punch cards for frequent visitors

Lots of special hugs & kisses, tender loving care from every host & hostess— our guests can't wait to return.

Management with Care

To keep our resort clean and healthy, we check each guest for parasites and give them baths when necessary. We also make sure that all our guests have current vaccinations to protect everyone.

A spa package can be created if your pet has special needs. Whether it be geriatric care or an effective weight loss program, all guests will be given the personalized, professional care they need.

A popular option is to enroll in our **Doggie Day Camp** program during the boarding stay. This ensures a full day of supervised recreation with his or her own special pack.

We fully admit that we spoil our guests. We give them special treats during **Yappy Hour** (yummy healthy snacks) unless they are on a restricted diet.

The Pet Suites Touch

Although many modern facilities have a few suites (*private rooms with special touches of home*), most boarded pets are kept in "runs", basically rows of cages in large rooms. As pets enter or leave these rooms, barking and other stressful activity occurs, keeping many of the animals in a constant state of agitation.

At Pet Suites, our 94 suites are grouped into boarding pavilions of approximately 16 suites each. Each suite has a tempered glass door which allows your pet to see out across an open court to several of his or her neighbors. Each pavilion has access to its own secure exercise and play yard where your pet is taken by a "pet attendant" several times each day. When animals enter or leave the pavilion, barking is minimal as most of the pets are unaware of what is taking place.

Although we could have built runs and housed over three times as many pets in our facility, we rejected that idea and placed our emphasis on quality. We strongly felt that a need existed for a pet boarding facility offering comfortable, roomy accommodations and individualized, **"hands on care"**.
